DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to device, classified in class 349, subclass 104.
- II. Claims 21-30, drawn to method of making, classified in class 438, subclass 30.
- III. Claims 31-32, drawn to method of using, classified in class 359, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions *tunable Fabry-Perot cavity filter and method for making and using the filter* are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the cavity between the reflective surfaces could be etched out of one substrate rather than placing two surfaces together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Lawrence Maxham on 1/28/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2812

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viktor Simkovic whose telephone number is 703-308-6170. The examiner can normally be reached on Mon - Fri, 9:00 - 6:00, except every other Friday.
